Response to Amendment

1. The reply filed on 4-20-06 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicants have not provided an adequate response to the double patenting rejection of claim 15 over claims 1-52 of U.S. Patent No. 6,472,209 B1. According to Applicant's response filed 4-20-06, Applicants submitted a terminal disclaimer over both US patents 6,723,560 and 6,472,209. However, contrary to Applicant's remarks, only a terminal disclaimer over US Patent No. 6,723,560 was filed by Applicants. See 37 CFR 1.111.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1633

3. Claims 15-24 and 26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-11, 13, 17-18 of U.S. Patent No. 6,989,270. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are an obvious variation of the issued claims. For example, the instant claims are drawn to a method of treating cells in a mammal comprising administering to said cells polyamide nucleic acid oligomers, and wherein said administration is extracranial administration. The instant claims differ from the claims of the issued US Patent to the extent that the issued claims are drawn to a method of treating an animal, and the claims of the instant application are drawn to a method of treating cells present in a mammal, it would have been obvious to the ordinary skilled artisan at the time of the instant invention that "a method of treating the cells present in a mammal" corresponds to a subgenus of the broader method comprising "a method of treating an animal containing a cell" as recited in the issued claims. Therefore, the scope of the instant claims represents an obvious variation of the issued claims.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1633

6. Claim 25 recites the limitation "wherein said administration is an intraperitoneal." There is insufficient antecedent basis for this limitation in the claim since independent claim 15 was amended to recite "extracranial administration."

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
